

## Confirmation of REACH compliance and SVHC statement

---

We confirm that all Anogas products are in full compliance with European REACH regulation EC 1907/2006 concerning restrictions on the manufacture, placing on the market and use of certain dangerous substances, preparations and articles, as amended up to the date of this letter. This means that all substances contained in our products are either:

- registered; and/or
- exempted from registration under REACH; and/or
- excluded from REACH altogether

For substances present in our products, which require registration and are not manufactured or imported by Anogas, we have received relevant confirmations from our suppliers.

### **Candidate list of Substances of Very High Concern (SVHC)**

The ECHA candidate list of Substances of Very High Concern (SVHC), first published on 28-10-2008, is regularly updated as more substances are identified as SVHC. We confirm that none of the substances included in this SVHC list, as amended up to the date of this letter, have been intentionally added to, or are known to be present in our products with concentrations exceeding the threshold of 0.1 % m/m.

### **Communication along the supply chain**

In order to ensure a successful implementation of REACH, it is very important to ensure an open and efficient communication along the whole supply chain. We hope that this information sheet contributes to this goal. In case you have additional REACH-related questions, please do not hesitate to contact us.
